Appraisal System – Bug Report Document
Prepared by: Rezwanul Rimel
Date:03.03.2026
Application URL: https://symphonious-pudding-1475cf.netlify.app/
Browsers Tested: Chrome Version 145.0.7632.117 (Official Build) (64-bit)
Operating System: Windows 11

Purpose

This document provides a detailed list of identified bugs and issues in the Appraisal System. Each bug includes a unique ID, description, steps to reproduce, expected and actual results, priority, severity, environment details, and supporting screenshots or videos.
The goal of this document is to assist the development team in efficiently reproducing, verifying, and resolving issues, ensuring improved functionality, usability, and consistency of the application.

Scope

The bugs listed in this report cover the following areas:
User login and registration flows
Password and security validations
Employee and admin appraisal processes
Goal planning and feedback modules
UI/UX consistency and usability issues

Bug Id: BUG_01
